

DISSOLVABLE BANDAGE

2024

Overview & Purpose

Offer a dissolvable bandage to the medical tapes and bandage Industry.

Applications and Benefits

- Unlike traditional medical tapes and bandages the product is not prone to attract and retain bacteria because of the ability to infuse antibacterial agents.
- Dissolvable Bandage can be infused or compounded with multiple soluble pharmaceuticals.
- Can be manufactured for any thickness or shape.
- Affordable

Markets:

General Wound Care Market:

1. Develop Direct to Consumer bandage
 - A) Childs Bandage Market

General Medical and Surgical:

1. Enter the 7 Billion dollar Medical Tapes and Bandage Industry.

Specialty Markets:

Dialysis(Hemodialysis):

1. Due to renal issues, patients are prone to thin delicate skin, existing bandages can cause irritation or even ulcerations when removed.
2. Market to established Dialysis companies like DaVita.
3. Enter the multimillion dollar growing [Dialysis Market](#).

Oncology:

1. The body can metabolize a dissolvable bandage. Pharmaceutical Compounding(medication) can be infused into a bandage for time release delivery of Chemotherapy Drugs.
2. Explore the possibility of encapsulation inoperable Tumors (Glioblastoma) with modified Pharmaceutical infused dissolvable bandages

Intravenous(IV) and Infusion Market:

1. Current medical tapes and gauze lack infused antibacterial agents to combat IV site infections, dissolvable bandages can be infused with multiple pharmaceutical compounds.

Goals

1. Complete Provisional Patent
2. Continue R &D
3. Obtain Utility Patent

Corporate Team

Dissolvable Bandage was invented by Martin D. Simpson who will assist with any tasks moving forward. However, an experienced leadership team is sought to take Dissolvable Bandage to the next level.
